Business Results

1. Analysis of Business Results

[Business Results for the Year Ended March 31, 2008]

(1) Economic Situation and Business Environment

The Japanese economy during the year ended March 31, 2008 (fiscal 2008) was characterized by steadily increasing exports and a high level of corporate earnings, while individual consumption was also stable. Slumping housing investment and rising energy and raw material prices, however, resulted in only moderate economic expansion overall. In the United States, credit uneasiness worsened, triggered by issues related to housing loans for individuals with low creditworthiness and culminating in heightened fears of a business slowdown beginning in the summer of 2007. Combined with this, a drop-off in individual consumption and restrained capital investment became obvious and resulted in economic deceleration. The European economy expanded moderately, supported by an increase in exports. Individual consumption in Europe has tapered off since the start of calendar year 2008, however, and the economic outlook has become increasingly uncertain. The Chinese economy continued to expand on account of increases in capital investment and exports, together with robust individual consumption.

In the digital consumer equipment market, which is the principal market for Kyocera Corporation and its consolidated subsidiaries ("Kyocera Group" or "Kyocera"), demands for mobile phone handsets, flat panel TV sets and other equipment expanded steadily, particularly in the first half of fiscal 2008. There have been inventory adjustments for mobile phone handsets in certain Asian markets, however, since the start of calendar year 2008. In addition, the yen appreciated against the U.S. dollar, with the exchange rate at one time dropping below 100 yen to the dollar.

(2) Consolidated Financial Results

During fiscal 2008, Kyocera Group worked aggressively to introduce new products and improve productivity in order to achieve continuous sales expansion and high profitability.

Consolidated net sales for fiscal 2008 amounted to \$1,290,436 million, an increase of only 0.5% compared with the year ended March 31, 2007 (fiscal 2007) but still marked the highest. This result can be attributed to an increase in sales in the Components Business, which more than offset a decrease in sales in the Equipment Business.

Profit from operations increased by 12.8% to ¥152,420 million due to a significant increase in profit in the Equipment Business, which was partly offset by a decrease in profit in the Components Business. Depreciation increased by ¥5,475 million resulting from a comprehensive review of the value of fixed assets, triggered by the tax revision in Japan.

Income from continuing operations before income taxes increased by 11.7% to \$174,842 million due to increases in equity in earnings of affiliates and unconsolidated subsidiaries and interest and dividend income. Net income increased by 0.7% to \$107,244 million.

(3) Implemented Management Measures and Significant Management Decisions made in Fiscal 2008

1) In September 2007, AVX Corporation (AVX), a U.S. subsidiary, acquired American Technical Ceramics Corp., a U.S.-based manufacturer of electronic components, and made it a wholly-owned subsidiary, with the goal of strengthening its business in the area of advanced components such as high frequency ceramic capacitors. This acquisition has enabled AVX to expand its product line-up and its sales networks for high-frequency products.

2) With the objective of further enhancing the Telecommunications Equipment Group, Kyocera concluded a basic agreement with SANYO Electric Co., Ltd. (SANYO) in October 2007 regarding acquisition by Kyocera of the mobile phone business of SANYO, and it concluded a final agreement relating thereto in January 2008. Through this acquisition, Kyocera seeks to expand sales and boost profitability in the Telecommunications Equipment Group by expanding its sales channels in North America and by integrating the excellent product development and design technologies of SANYO with the management resources of Kyocera. This acquisition was completed on April 1, 2008.

(4) Consolidated Financial Results by Business Segment

Sales in the Components Business increased by 4.5% compared with fiscal 2007 to $\pm 679,990$ million, while operating profit decreased by 4.1% to $\pm 100,373$ million. The operating profit ratio was 14.8%.

In particular, the Applied Ceramic Products Group posted a considerable increase in sales compared with fiscal 2007 driven by the solar energy business in overseas markets, which led to the overall increase in sales in the Components Business compared with fiscal 2007. Despite an increase in profit in the Applied Ceramic Products Group, operating profit in the Components Business decreased overall compared to fiscal 2007 due to a decline in profit in the Fine Ceramic Parts Group, the Semiconductor Parts Group and the Electronic Device Group.

Sales in the Equipment Business decreased by 4.3% compared with fiscal 2007 to ¥497,563 million, while operating profit increased significantly by 35.2% to ¥46,324 million. The operating profit ratio was 9.3%.

Overall sales in the Equipment Business were down from fiscal 2007, despite an increase in sales in the Information Equipment Group, on account of a decrease in sales in the Telecommunications Equipment Group. Operating profit in the Equipment Business increased significantly overall, however, owing to an increase in profit in both reporting segments.

Consolidated results by reporting segment are as follows.

Components Business:

1) Fine Ceramic Parts Group

This reporting segment includes fine ceramic components and automotive components.

Sales of parts for diesel engines for automobiles, sapphire substrates for LEDs and dielectric parts for mobile phone base stations all increased. However, there was a decrease in demand for parts for semiconductor fabrication equipment, one of the core products in this reporting segment, due to a decrease in capital investment in the semiconductor industry. As a result, sales in this reporting segment remained level with fiscal 2007. Operating profit decreased compared with fiscal 2007 due primarily to an increase in depreciation.

2) Semiconductor Parts Group

This reporting segment includes ceramic packages and organic packages.

Sales of Surface Mount Device (SMD) ceramic packages for electronic components, ceramic packages for image sensors and organic packages increased steadily. Sales of parts for optical telecommunications devices decreased, however, leading to only a slight increase in overall sales in this reporting segment compared with fiscal 2007. Although losses shrank substantially in the organic package business, overall operating profit in this segment decreased due to an increase in depreciation cost coupled with a decline in selling prices.

3) Applied Ceramic Products Group

This reporting segment includes solar power generating systems, cutting tools, dental and medical implants, and jewelry and applied ceramic related products.

Both sales and operating profit increased significantly in this reporting segment compared with fiscal 2007 due to considerable growth in sales in the solar energy business in overseas markets, notably Europe, and to an increase in sales in the cutting tool business.

4) Electronic Device Group

This reporting segment includes electronic components such as various types of capacitors, crystal related products and connectors, and thin-film products such as thermal printheads.

Demands for capacitors and crystal related products have decreased since the start of calendar year 2008. Production of digital consumer equipment was solid throughout fiscal 2008, however, resulting in increased overall sales in this reporting segment compared with fiscal 2007. Operating profit decreased substantially, however, due to a decline in selling prices, etc.

Equipment Business:

1) Telecommunications Equipment Group

This reporting segment includes mobile phone handsets as well as PHS base stations and handsets.

Despite strong sales in the mobile phone handset business in Japan, a slow sales overseas culminated in a decline in overall sales in this reporting segment compared with fiscal 2007. Operating profit increased significantly compared with fiscal 2007, however, due to a reduction in product development and production costs in the domestic mobile phone handset business, and improved profitability in the PHS related business as a result of concentrating management resources in Japan.

2) Information Equipment Group

This reporting segment includes ECOSYS brand printers and digital MFPs.

Sales in this reporting segment increased due to sales growth in printers, particularly in Europe, spurred by aggressive new product introductions and enhanced sales activities. Operating profit increased significantly compared with fiscal 2007 on account of new product introductions and increased sales of consumables in addition to the positive effect of yen depreciation against the Euro.

Others:

This reporting segment includes various information and communications technology services, materials for electronic components and optical components.

Sales in this reporting segment increased slightly compared with fiscal 2007 to ¥138,494 million. Operating profit increased substantially by 40.0% to ¥9,635 million due to improved profitability at Kyocera Communication Systems Co., Ltd. and in the optical related business.

Note 1. From April 1, 2007, the "Optical Equipment Group," previously a separate reporting segment, has been reclassified into "Others." Accordingly, sales and operating profit for fiscal 2007 have been retroactively reclassified.

Note 2. For the reasons set forth in Note 1 above, net sales of "Others" in fiscal 2007 increased by \$11,579 million and "Adjustments and eliminations" decreased by \$(125) million compared with those previously announced. Also, operating profit of "Others" in fiscal 2007 decreased by \$1,895 million compared with those previously announced.

1) Japan

Sales increased compared with fiscal 2007 due mainly to increase in sales in the Semiconductor Parts Group and Kyocera Communication Systems, Co., Ltd.

2) United Sates of America

Sales decreased compared with fiscal 2007 due mainly to a decline in sales in the Telecommunications Equipment Group.

3) Asia

Sales increased compared with fiscal 2007 due to sales growth in the Electronic Device Group.

4) Europe

Sales increased in the Information Equipment Group and the solar energy business in the Applied Ceramic Products Group. As a result, sales in this region increased compared with fiscal 2007.

5) Others

Although sales in the Information Equipment Group in Latin America and Middle East increased, sales in the Telecommunication Equipment Group in Latin America and Oceania declined. As a result, overall sales in this region decreased compared with fiscal 2007.

(6) Capital Expenditures and Depreciation

Depreciation	70,155	5.5	75,630	5.9	7.8

During fiscal 2008, Kyocera made capital expenditures particularly to increase production capacity in the Electronic Device Group and the solar energy business in response to burgeoning demand. Overall capital expenditures in fiscal 2008 increased compared with fiscal 2007. Furthermore, depreciation increased compared with fiscal 2007 due to the increase in capital expenditures in fiscal 2007 and to a review of depreciation method, triggered by the tax revision in Japan.

The global economic downturn is expected to intensify in fiscal 2009, fuelling fear of a negative impact on demand for digital consumer equipment, and therefore also uncertainty in the outlook for component demand.

Based on this market outlook, Kyocera believes that sales in the Components Business will be sluggish in fiscal 2009. However, Kyocera forecasts increase of sales compared with fiscal 2008 owing to a sales increase as a result of the acquisition of the mobile phone business of SANYO in the Telecommunications Equipment Group, and to an increase in sales from the Applied Ceramic Products Group, particularly relating to the solar energy business. On the other hand, operating profit is expected to decrease compared with fiscal 2008 due mainly to costs associated with infrastructure development in line with business integration in the Telecommunications Equipment Group, receive erosion in the Components Business and the impact of the appreciation of the yen.

Nonetheless, Kyocera aims at a minimum to achieve its aforementioned financial forecasts. To improve business performance, Kyocera will work aggressively to introduce new products, reduce costs, enhance productivity and cultivate new markets.

Consolidated sales and operating profit forecasts by reporting segment are as follows.

Cash and cash equivalents at end of year	282,208	447,586	165,378

(1) Cash flow from operating activities

Net cash provided by operating activities in fiscal 2008 increased by $\frac{149,644}{1000}$ million to $\frac{196,935}{1000}$ million from $\frac{149,644}{1000}$ million in fiscal 2007. This was due mainly to a decrease in receivables that increased in fiscal 2007.

(2) Cash flow from investing activities

Cash flow from investing activities turned from ¥151,703 million of cash outflows in fiscal 2007 to ¥14,894 million of cash inflows in fiscal 2008. This was due mainly to a large increase in withdrawal of time deposits, which exceeded increases in purchases of property, plant and equipment, and intangible assets, and acquisitions of businesses.

(3) Cash flow from financing activities

Net cash used in financing activities in fiscal 2008 increased by ¥7,426 million to ¥28,071 million from ¥20,645 million in fiscal 2007. This was due mainly to an increase in dividends paid.

Interest bearing debts represent all debts with interest expense included in consolidated balance sheets.

3. Basic Profit Distribution Policy and Dividends for Fiscal 2008 and Fiscal 2009

(1) Basic Profit Distribution Policy

Kyocera believes that the best way to increase corporate value and meet shareholders' expectations is to improve future consolidated performance. Kyocera therefore strongly takes into consideration the linkage between dividend amounts and consolidated performance and has implemented a dividend policy aiming for a consolidated dividend ratio of approximately 20% to 25%. In addition, Kyocera determines dividend amounts based on an overall assessment, taking into account various factors that include the amount of capital expenditures necessary for medium to long-term growth.

In order to ensure a sound financial basis, Kyocera also sets aside other general reserves in preparation for the creation of new businesses, cultivation of new markets, development of new technologies and acquisition of outside management resources needed to achieve sustainable corporate growth.

(2) Dividends for Fiscal 2008

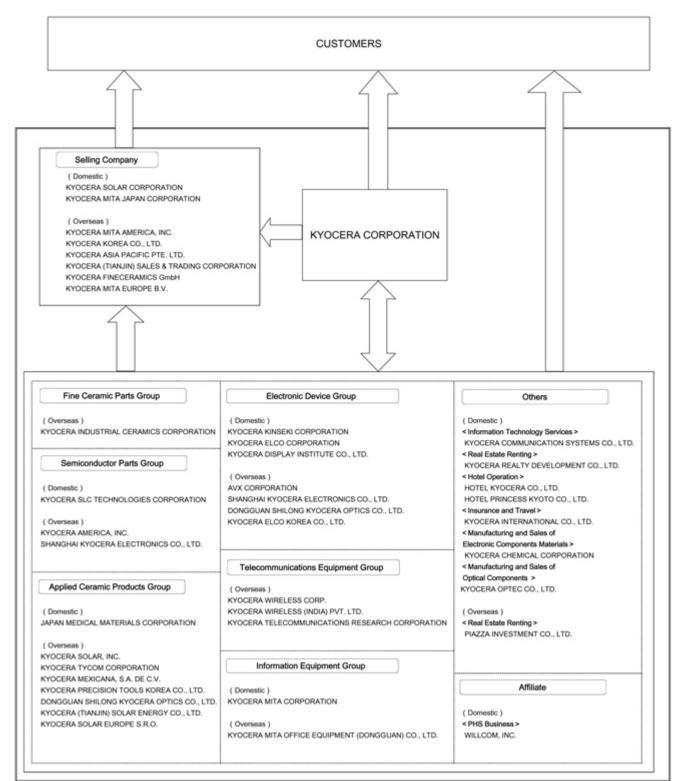

Based on performance during fiscal 2008 and pursuant to the aforementioned policy, Kyocera will distribute a year-end dividend in the amount of 60 yen per share. When aggregated with the interim dividend in the amount of 60 yen per share, the total annual dividend will be 120 yen per share, an increase of 10 yen compared with fiscal 2007.

(3) Dividend Forecast for Fiscal 2009

Dividend amounts for fiscal 2009 will be decided pursuant to "(1) Basic Profit Distribution Policy" set forth above. At present, Kyocera forecasts a total annual dividend in the amount of 120 yen per share based on financial forecast for fiscal 2009.

KYOCERA GROUP

Kyocera group consists of Kyocera Corporation, 176 subsidiaries and 10 affiliates. (Chart of the group companies)

Management Policies

1. Basic Policy

Kyocera aims to be respected by society as "The Company" from the perspective of corporate ethics, while maintaining continuous sales growth and high profitability. To achieve this management vision, Kyocera's management policy is to further drive business expansion to be "a creative company that continues to grow." In order to implement this policy, Kyocera aims to increase corporate value by expanding businesses; namely by promoting efficient use of management resources and further strengthening consolidated group management.

2. Target of Pre-tax Income Ratio

To be "a creative company that continues to grow," Kyocera aims to achieve its target of a pre-tax income ratio of 15% or higher.

3. Medium Term Management Strategy

Kyocera promotes "high-value-added diversification" as its management strategy to realize such management policy. This involves ensuring that each business is highly profitable and pursuing synergies within Kyocera with the objective of driving sustainable growth even in an ever-changing business environment.

Specifically, Kyocera aims to: 1) exploit competitive advantages; 2) strengthen existing businesses; and 3) create new businesses.

1) Exploit competitive advantages

The "Kyocera Philosophy," which places people's hearts at its core, the "Amoeba Management" system, which is unique to Kyocera and has been a driving force for growth since Kyocera Corporation's earliest days, and a strong financial structure, are sources of competitive advantage for Kyocera over other companies in implementing its diversification strategy. With these foundations firmly in place, Kyocera endeavors to strengthen competitiveness in technological development, sales and marketing in the high-growth potential markets for telecommunications and information processing and for environmental protection, and to translate its diversification strategy into improved business performance.

2) Strengthen existing businesses

Kyocera strives to continuously improve profitability in all existing businesses within Kyocera Group. Elsewhere, by strengthening ties and maximizing synergies between headquarters Kyocera Corporation and Kyocera Group companies, Kyocera seeks to improve profitability in each business segment on a consolidated basis. In promoting a global strategy in each business, Kyocera has created development, manufacturing and sales systems in optimal locations, while the integration of Group-wide resources helps boost the competitiveness of existing businesses. Kyocera regularly reviews those businesses that have lost market competitiveness and that show little promise of expansion going forward.

3) Create new businesses

Kyocera endeavors to create businesses that will become its core going forward in order to improve consolidated performance over the medium term. To achieve this goal, Kyocera integrates Group-wide management resources to develop new technologies and products and create new markets. The focus of Kyocera's business creation strategy lies in the markets for telecommunications and information processing and for environmental protection.

4. Challenges

Kyocera faces the following challenges from fiscal 2009 onward, in light of the aforementioned medium to long-term management strategy.

(1) Improve profitability in the Telecommunications Equipment Group

Kyocera acquired the mobile phone business of SANYO on April 1, 2008. As a result, the Telecommunications Equipment Group now generates the largest amount of sales among all of Kyocera's reporting segments. Going forward, Kyocera seeks to achieve the following three goals as a means to swiftly improve profitability in such business: 1) expand sales and improve profitability in the mobile phone market in North America; 2) further expand market share and establish strong business foundations in the Japanese mobile phone market; and 3) expand the wireless telecommunication systems business.

(2) Strengthen new product development and create new businesses

Kyocera promotes the development of small ceramics and organic packages in the Semiconductor Parts Group and electronic devices befitting sophisticated digital consumer equipment for the telecommunications and information processing market. Kyocera is also striving to increase the conversion efficiency of photovoltaic generating systems for the environmental preservation market. In addition, Kyocera seeks to create new businesses in key markets by leveraging its cutting-edge materials and components technologies amassed across departments within Kyocera. Specifically, Kyocera is pushing ahead with development aimed at quick commercialization of solid oxide fuel cells (SOFC) for household use by exploiting materials technology employed in fine ceramic parts.

Notes:

- 1. Kyocera applies the Statement of Financial Accounting Standards Board (SFAS) No.130, "Financial Reporting of Comprehensive Income." Based on this standard, comprehensive income for the years ended March 31, 2007 and 2008 were an increase of ¥219,055 million and a decrease of ¥51,746 million, respectively.
- 2. Earnings per share amounts were computed based on SFAS No.128, "Earnings per Share." Under SFAS No.128, basic earnings per share was computed based on the weighted average number of shares of common stock outstanding during each period and diluted earnings per share assumed the dilution that could occur if securities or other contracts to issue common stock were converted into common stock, exercised or resulted in the issuance of common stock.
- 3. In March 2005, Kyocera received a Correction Notice from the Osaka Regional Taxation Bureau regarding transfer pricing. In May 2005, Kyocera filed the Request for Reinvestigation. As a consequence of Kyocera filing the Request for Reinvestigation, the Osaka Regional Taxation Bureau approved a refund for ¥4,035 million which was recorded in income taxes for the year ended March 31, 2007.
- 4. Kyocera sold its entire shares in Kyocera Leasing Co., Ltd., a subsidiary engaged in financial services; as a result, business results and profit on sales, ¥5,175 million, for Kyocera Leasing Co., Ltd. for the year ended March 31, 2007 have been recorded as income from discontinued operations in conformity with SFAS No.144, "Accounting for the Impairment of Disposal of Long-Lived Assets."

3. Summary of significant accounting policies

Kyocera's consolidated financial statements are prepared in conformity with accounting principles generally accepted in the United States of America.

(1) Valuation of inventories

Finished goods and work in process are mainly stated at the lower of cost or market, the cost being determined by the average method. All other inventories are mainly stated at the lower of cost or market, the cost being determined by the first-in, first-out method.

(2) Valuation of securities

Kyocera adopts SFAS No.115, "Accounting for Certain Investments in Debt and Equity Securities." Held-to-maturity securities are recorded at amortized cost. Available-for-sale securities are recorded at fair value, with unrealized gains and losses excluded from income and recorded in other comprehensive income, net of taxes.

(3) Depreciation method of Property, Plant and Equipment

Depreciation is computed based mainly on the declining balance method over their estimated useful lives. Effective April 1, 2007, Kyocera Corporation and its domestic subsidiaries, as a result of taking the business situation into consideration, has adopted "the 250 percent declining-balance depreciation method" for buildings, machinery and equipment. Estimated useful lives and estimated salvage values were also changed in conjunction with this change. Under the provisions of SFAS No. 154 "Accounting Changes and Error Corrections, a replacement of APB Opinion No. 20 and FASB Statement No. 3," a change in depreciation method is treated as a change in estimate. The effect of the change in depreciation method will be reflected on a prospective basis beginning April 1, 2007, and prior period results will not be restated. Kyocera Corporation and its domestic subsidiaries believe that the change from the declining-balance depreciation method to the 250 percent declining-balance depreciation method will better reflect future business situation and will provide a better matching of costs and revenues over the assets' estimated useful lives.

(4) Goodwill and other intangible assets

Kyocera adopts SFAS No. 142, "Goodwill and Other Intangible Assets."

(5) Accounting for allowances and accruals

Allowance for doubtful accounts : Kyocera provides allowance for doubtful accounts based on the past actual ratio of losses on bad debt in addition to the estimation of uncollectible amount based on the analysis of certain individual receivables.

Accrued pension and severance cost :

Kyocera adopts SFAS No. 87, "Employers' Accounting for Pensions" and SFAS No. 158, "Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans - an amendment of FASB No. 87, 88, 106 and 132(R)," and pension and severance cost is accrued based on the projected benefit obligations and the fair value of plan assets at the balance sheet date. Prior service cost is amortized by the straight-line method over the average remaining service period of employees. Actuarial loss is recognized by amortizing a portion in excess of 10% of the greater of the projected benefit obligations or the marketrelated value of plan assets by the straight-line method over the average remaining service period of employees.

(6) Accounting change

In June 2006, the Financial Accounting Standard Board (FASB) issued Interpretation No. 48, "Accounting for Uncertainty in Income Taxes - an interpretation of FASB Statement No. 109 "(FIN48) which clarifies the accounting for uncertainty in income taxes recognized in the financial statements in accordance with SFAS No. 109, "Accounting for Income Taxes." FIN48 also provides guidance on derecognition, classification, interest and penalties, disclosure and transitional measures. Cumulative effect of applying FIN48, which was effective April 1, 2007, increased the opening balance of retained earnings by ¥3,968 million.
