

# 5G Smart Router

Connecting all devices to the cloud with 5G

## 01 Features

- Connect to 5G via HDMI, USB, Wi-Fi, Bluetooth, etc.
- Upload data from various edge devices to the cloud
- Data processing and feedback with edge computing

## 02 Use Cases

- Connect to high-resolution cameras, vital sensors, and more for real-time AI analysis and reduced security risks
- Interpret human emotions through instantaneous voice data analysis to facilitate smooth communication

## 03 Solutions Expansion

- Development of system environments that meet client needs, including full system development and edge computing solutions
- Support companies expanding 5G capabilities in their products
