

Document Solutions

Printers & Multifunctional Products

Kyocera offers a full line of printers and multifunctional products (MFPs) that are both ecological and economical, for customers ranging from home office users to large corporations. A unique feature of our products is their outstanding long-life performance, which has earned a strong reputation worldwide.

ECOSYS Printers

Utilizing our accumulated expertise in developing document management equipment with long-life performance, ECOSYS printers help minimize environmental impact and network operating costs.

TASKalfa Multifunctional Products (MFPs)

TASKalfa MFPs are so named by combining the words “task” and “alfa.” Designed with proprietary, ultra-reliable technology to maximize work efficiency, TASKalfa MFPs provide comprehensive document solutions for every user.

Toner-Only System

Environmentally friendly “toner-only” imaging systems are installed in all ECOSYS products. Since only the toner cartridge requires routine replacement, operating costs and waste are greatly reduced.

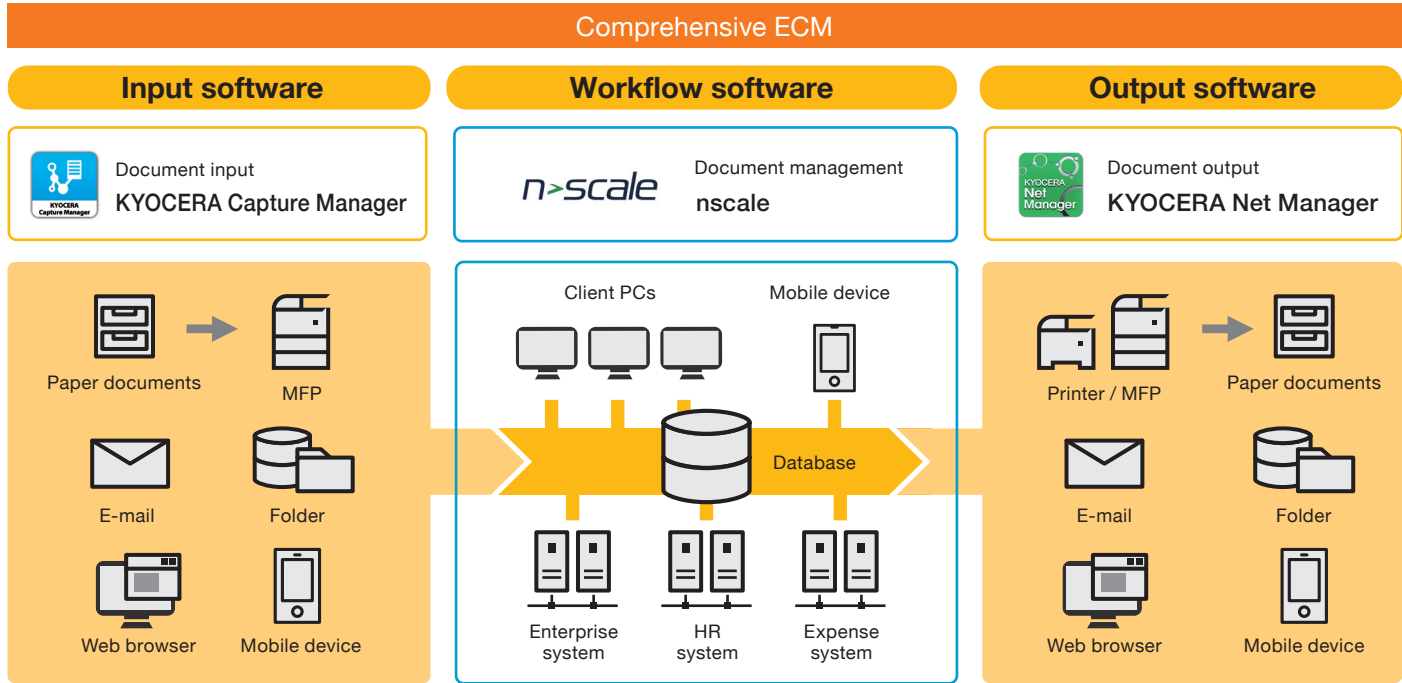

Kyocera Document Solutions Earns Germany's Blue Angel Award

Released in 1992 as a new concept in the industry, Kyocera's first ECOSYS printer, the FS-1500, could print 300,000 pages with no maintenance other than adding toner. A later version in 1997 became the world's first printer to win Germany's Blue Angel eco-label. Now, more than a quarter-century later, the outstanding long-life performance of ECOSYS printers continues to set new standards.

Enterprise Content Management (ECM) Solutions

Kyocera's Enterprise Content Management (ECM) solutions enhance customers' productivity and efficiency through comprehensive management of data and documents. Combined with our proprietary document software, Kyocera's ECM solutions are developed entirely in-house and cover all aspects of document management, from input to output. Moreover, seamless connection with Kyocera printers and MFPs ensures a total ECM service.

Inkjet Printing Systems

Using proprietary image-processing and paper-handling technologies developed for office printers and MFPs, Kyocera is expanding its inkjet technology into commercial printing applications such as catalogs and direct-mail leaflets.
