

# SINGLE CRYSTAL SAPPHIRE

### SINGLE CRYSTAL SAPPHIRE

Single Crystal Sapphire is playing an ever-increasingly important role as a material for, high reliablility Electronics today due to its excellent mechanical characteristics, chemical stability and light transmission.

Kyocera mass-produces Single Crystal Sapphire in a vertically integrated manner. From "pulling up" the raw material with EFG (Edge-Defined Film-Fed Growth) methods to machining, Kyocera produces and supplies various products with large diameters or specific shape requirements.

### FEATURES OF EFG METHOD

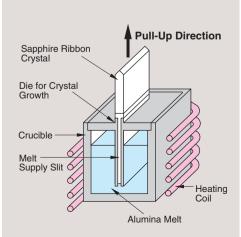

### Large Size Material

Sizing-up of materials allows for a broader range of applications and uses.

 Production of Single Crystal Sapphire in Any Desired Sectional Shape Since any desired sectional shape can be obtained in the form of ribbons, tubes, rods, and others, cutting processes can be eliminated, allowing for a reduction in cost.

#### Control of Crystal Orientation

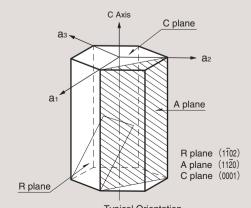

Any axis and plane can be produced by instituting proper control during crystal growth.

Typical Orientation

### FEATURES OF SINGLE CRYSTAL SAPPHIRE

 High Strength, High Rigidity, High Anti-Abrasion, High Anti-Heat, High Anti-Corrosion Characteristics, and High Anti-Plasma Characteristics.

Because of these characteristics, Single Crystal Sapphire is widely used for precision mechanical parts.

Stable Dielectric Constant, Very Low Dielectric Loss, Good Electrical Insulation Single Crystal Sapphire is used as a material for substrates in super-high frequency regions. It is also used as an insulation material and microwave window. Single Crystal Sapphire has become indispensable in the Electronics Industries.

#### Excellent Light Transmission

Single Crystal Sapphire is used for various kinds of vacuum equipment, windows in reaction furnace, scanner windows and caps for optical communication due to its excellent mechanical characteristics and heat resistance.

### Good Thermal Conductivity and High Heat Resistance

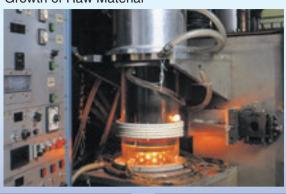

Excellent thermal conductivity at low temperatures allows Single Crystal Sapphire as a transparent material to be used in many diverse fields requiring thermal conduction and heat radiation.

### Substrate

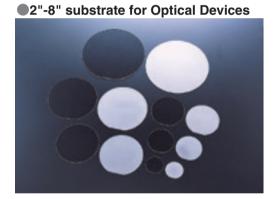

### Application

(1)High Brightness LED
(2)HB-LED Semiconductor, Piezoelectric Semiconductor, Superconductor, Thin Film Substrate.
(3)MR Sensor, Precision Resistor

(4)Optical Devices

(5)Thin Film HIC

- Single Crystal Sapphire is widely used substrate material for blue, green, ultraviolet and white LEDs. It has excellent features as a base substrate for GaN deposition and great mass-productivity. In addition, it can meet future larger-size demand.
- Single Crystal Sapphire is used as a base substrate in thin film deposition because of its lattice alignment match with a variety of semiconductor materials combined with excellent thermal and chemical stability.

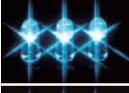

### Standard Dimension and Tolerance

Size	O.F. Length	
8″ φ200±0.25×0.725±0.05	55~60	
$6'' \phi 150 \pm 0.25 \times 0.625 \pm 0.05$	45~50	
$5'' \phi 125 \pm 0.25 \times 0.625 \pm 0.05$	40~45	
$4'' \phi 100 \pm 0.25 \times 0.53 \pm 0.05$	30~35	
$3'' \phi 76.2 \pm 0.25 \times 0.43 \pm 0.05$	19~25	
$2'' \phi 50.8 \pm 0.25 \times 0.33 \pm 0.05$	13~19	

Specifications other than above are available.
 Available sizes are dependent on a crystal orientation.
 Sizes and tolerances other than the above table are also available under customer requirements. Please contact or send your requirements to Kyocera.

Application Examples

### Semiconductor Process Equipment Parts

Application

- (1)Carrier Plate (2)Microwave Entrance Tube (3)Dummy Water (4)Handling Arm (5)Vacuum Chuck (6)Window
- It is used as various Semiconductor Process Equipment due to its high anti-plasma and high anti-heat characteristics.

### Optical Products for LCD Projectors

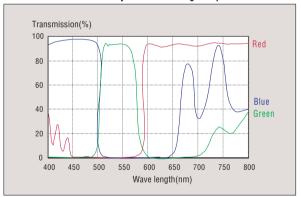

### Application

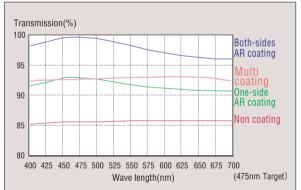

- (1) Sapphire Plate
  - Polarizing Film Attached
  - Holder Assembled
  - Dichroic Filter
- (2) LCD Projector Dust Control Plate
- Sapphire material realizes high brightness and high picture quality for LCD projectors due to its high thermal conductivity and optical properties.
- Coating such as Dichroic Filter, to prevent reflection features is available.
- Standard sizes to fit in various LCD panels are available.
